

CITY of CALABASAS

California State Forestry Department

'2006/2007 GREEN TREES FOR THE GOLDEN STATE'

Urban Forestry Street Tree Planting Project

CALABASAS

10 YEAR MEMBER OF TREE CITY USA

Beginning in the fall of 2008 the city plans to install approximately 500 street trees in the Malibu Canyon, Declaration and Eddingham neighborhoods of the city.

This project is part of an ongoing effort between the city and the state department of forestry to replace missing, diseased or inappropriate parkway trees throughout the city, in order to create a more beautiful environment for residents and visitors.
