

Our Time is Now: Power, Purpose and the Fight for a Fair America by Stacey Abrams

You may know Stacey Abrams as a candidate for governor of Georgia but she is also a Yale Law School graduate, tax attorney and former minority leader of the Georgia House. Stacey is also an expert on fair voting and in this book she describes how voter suppression is shredding our democracy. Whether it's through difficult voter registration, excessive voter purges, or not enough polling places, it results in building obstacles to access. It is happening across America and should alarm all of us. It results in stealing our future. After reading this book, my guess is you will never think about voting the same way again. I know I don't. The title is available in book, e-book and e-audiobook.
