

# Apps - Fire Download from Amazon AppStore

As of October 2023, Amazon Fire users (with Fire OS 8 or higher) can download the CloudLibrary mobile app directly from the Amazon Appstore for Android. This article describes the new Fire download process. Note: this process will require users to re-login to the app.

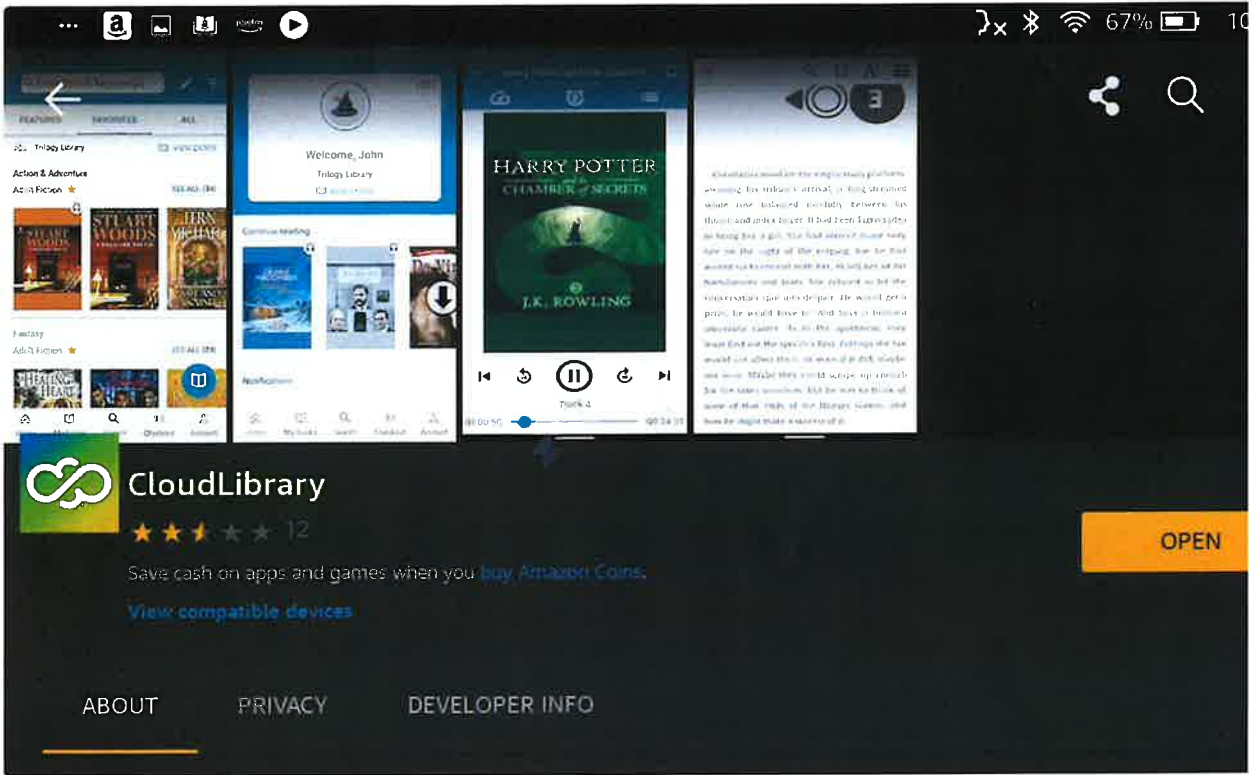

## Instructions

1. If you have installed the CloudLibrary app on your Fire device before October 31st, 2023 we highly recommend uninstalling the old version of the app first before installing the app from the Amazon Appstore. To uninstall, locate the CloudLibrary app icon on the Home screen on your device. Press down and hold the icon until a window pops up. Tap **Uninstall App**.
2. Go to the Appstore on your Fire device and search **CloudLibrary**. Tap to select **CloudLibrary** and at the download page, tap the yellow **DOWNLOAD** button:

3. Once the download is complete tap the yellow **OPEN** button:

Or, locate the CloudLibrary app icon that has populated on the Home screen. Tap on the icon and login to the app. An article regarding the CloudLibrary app login process can be found here: [Here](#).
